

Howard Jr. High

Campus Educational Improvement Committee Meeting Agenda & Notes

Date: 9/25/25

Location: Howard Jr. High Library

Agenda and Notes:

Welcome/Introductions

Review CEIC Roles and Responsibilities Principal Report

Proposed Focus/Direction

Campus Goals and Review of CNA Additional Proposals/Questions

Next Meeting December 3 @ 3:30 in the Library

CEIC 9/25/25

Notes From Meeting:

- Meeting began with introductions and a review of the mission of Howard
- Discussion of the purpose of the committee and the meetings we are having
- Mr. Williams gave a general overview of what we accomplished last year, the CNA, how it is developed and what we may need to look at moving forward to address the goals of the campus.
- Mr. Williams mentioned that one focus they had last year was encouraging students across the campus to be more service minded in their community and the projects they did to accomplish that. He wants to continue that as one of the priorities moving forward.
- Mr. Williams proposed that in addition to the service focus that there needed to be a focus on student academic growth. He proposed that we partner more with

parents to help them understand what the data says for each of their students and how they can work with the campus to help their students grow.

- Comments from the committee:
 - They like the videos Mr. Williams has sent out and think that may be one way to communicate those goals and encourage parents to engage in the academic growth.
 - Hold a parent meeting to train parents on what they are looking at and what the MAP and STAAR tests really indicate
 - Reminders on parent square when unit tests that measure student growth occur so parents can have those conversations
 - A potential tracker being developed to be shared with parents to discuss with their children
 - Maybe a parent code for data hub that allows parents to see their student data
 - Weekly grade updates from teachers to parents
- Although Mr. Williams reviewed the CNA he wanted to go into more detail and discussion regarding it but time did not allow. Every person was given a copy and asked to look more closely at it until our next meeting where he plans to go more in depth in the conversation. Date was discussed for 12/3 when we will return as a committee.

Meeting was concluded with a Launch using a quote from Einstein.
